Career & Technical Education

New York State’s approval process for Career and Technical Education (CTE) programs has raised the quality and rigor of courses that prepare students for employment and postsecondary study. Approved programs lead to an industry-recognized credential or certificate at the postsecondary level, or an associate or baccalaureate degree. CTE courses offer students the opportunity to apply academic concepts to real-world situations and prepare them for industry-based assessments or certifications. They have the opportunity to earn college credit or advanced standing while still in high school and take part in work-based learning opportunities where they demonstrate mastery of skills essential in the workplace. In addition, our Technical Endorsed programs, embedded in area businesses, have been recognized by District Administration magazine as one of more than 30 national innovative programs.

In 2019, nearly 440 seniors from OCM BOCES’ component districts were eligible to earn CTE endorsements on their high school diplomas, including Fabius-Pompey students Kaleigh Chartrand, Nathaniel Doupe, Savanna June, Tyler Putnam, Angela St. Germain, Evan McCarthy, Julia Taubman, Novella Tummino, and Harina Weslowski.

OCM BOCES & Fabius-Pompey = Student Success

Since she was 11 years old, Fabius-Pompey senior Alyssa Golden has known that she wants to work in the construction field.

“I started working in construction with my grandfather at age 11, and I know for a fact that this is what I want to do,” Alyssa said.

For the last two years, Alyssa has spent her time preparing for this career by attending the OCM BOCES Career & Technical Education Construction program at the Thompson Road Campus. In this program, Alyssa has been able to learn all aspects of construction, from drawing up plans and pricing, to framing, plumbing and electrical work.

“Alyssa has awesome academic skills that translate to hands-on applications in the field,” said her teacher, Jim Bender. “The CTE program has helped her develop skills and gain practical hands-on knowledge of building a house.”

After graduation, Alyssa plans to start a career in the construction field using the skills she obtained through the CTE program. She is also considering attending college to get a business degree, with the goal of running her own company someday.

“BOCES is hands-on,” Alyssa said. “You cannot always learn from reading a book — you actually have to do it here.”

Did You Know?

Fabius-Pompey is spending this year really taking a look at their literacy programs. Under the direction and leadership of Chantal Corbin, who participated in our Principals’ Prime this past summer, teachers are being encouraged to look at the science behind how students learn to read and to truly explore their instructional practices and how they impact their students’ ability to read at or above grade level. These teachers are participating in LETRS training and are implementing what they learn in their classrooms. Their dedication to continuous learning is both admirable and inspirational.
