## CAREER & TECHNICAL EDUCATION

New York State's approval process for Career and Technical Education (CTE) programs has raised the quality and rigor of courses that prepare students for employment and postsecondary study. Approved programs lead to an industry-recognized credential or certificate at the postsecondary level, or an associate or baccalaureate degree. CTE courses offer students the opportunity to apply academic concepts to real-world situations and prepare them for industry-based assessments or certifications. They have the opportunity to earn college credit or advanced standing while still in high school and take part in work-based learning opportunities where they demonstrate mastery of skills essential in the workplace. In addition, our Technically Endorsed programs, embedded in area businesses, have been recognized by *District Administration* magazine as one of 33 national innovative programs.

In 2017, nearly 400 seniors from OCM BOCES' component districts were eligible to earn CTE endorsements on their high school diplomas, including Jacob Aller, Andrea Chapman, Henry Corbin, David Cox, Trey Donahue, Justin Marsh, Rachel Marsh, Ethan Marshall, Patrick Moade, David Pilcher, Addison Randall, Danielle Tebo, Austin Wood and Johnathan Wood from the DeRuyter Central School District.

OCM BOCES purchased the **Forecast5** analytics software for all 23 component districts on a trial basis for the next two years. The program collates demographic and peer data for school districts across New York State and allows districts to access that information for the purpose of developing future-focused strategies to manage their limited resources and achieve improving academic success in today's challenging budget environment.

## OCM BOCES & DERUYTER CSD = STUDENT SUCCESS

Within 30 minutes of attending the OCM BOCES Automotive Collision Technology program on the Cortlandville Campus, Taylor Kiggins knew he wanted to stay. The DeRuyter senior uses words like "amazing" and "priceless" to describe the knowledge and experience he has gained in a field he fully intends to pursue as a career.

"This class is amazing and centered around each student's growth as a technician," Taylor said. "We get to use so many amazing tools — tools that even some repair garages may not have."

That experience, he believes, will give him a step up when it comes to finding an entry-level job at a higher-end body shop, which in turn could lead to more opportunities for advancement. Taylor expresses a huge amount of gratitude for his opportunity at OCM BOCES and credits his instructor, Dale Gendron, for much of his inspiration and success.

"There have been a lot of supportive adults, but one of the most colorful characters is my mentor, Mr. Gendron," he said. "He's supportive, understanding and always willing to help a student if he or she needs it. He sees the potential in every student."

Gendron, in turn, said Taylor "has consistently exhibited an eagerness to learn and has shown capability in all facets of automotive collision repair and refinishing," including non-structural metal repair, welding, and refinishing. "Taylor is also skilled at problem-solving, teamwork and working with peers," he said.

In addition, Gendron said Taylor is an exemplary student and a "self-starter" with a positive attitude and pleasant demeanor. He predicts Taylor will be "a great, charismatic technician" and well-prepared to pursue his dream of becoming an automotive technician in the U.S. military.

## DID YOU KNOW?

Special education teachers from DeRuyter CSD attended the RSE TASC's Build a Better IEP series. Participants learned to develop IEPs that are compliant with state regulatory language, methods for writing measurable annual goals that are based on student needs identified by data from assessments and the critical importance progress monitoring plays in the implementation of an IEP. These teachers continued their learning beyond the trainings by reaching out to the RSE TASC trainer for guidance and follow-up.
