Career & Technical Education

New York State's approval process for Career and Technical Education (CTE) programs has raised the quality and rigor of courses that prepare students for employment and postsecondary study. Approved programs lead to an industry-recognized credential or certificate at the postsecondary level, or an associate or baccalaureate degree. CTE courses offer students the opportunity to apply academic concepts to real-world situations and prepare them for industry-based assessments or certifications. They have the opportunity to earn college credit or advanced standing while still in high school and take part in work-based learning opportunities where they demonstrate mastery of skills essential in the workplace. In addition, our Technically Endorsed programs, embedded in area businesses, have been recognized by *District Administration* magazine as one of more than 30 national innovative programs.

In 2018, nearly 300 seniors from OCM BOCES' component districts were eligible to earn CTE endorsements on their high school diplomas, including Jamesville-DeWitt students Shannon Adams, Cheyenne Brebeck, Trae Farrington, Charlie Reynolds and Scarlett Viefhues.

OCM BOCES & Jamesville-DeWitt = Student Success

When your long-time career goal involves working in the food industry, the chance to participate in an OCM BOCES Career & Technical Education culinary program is an obvious choice. That was certainly the case for Jaleel Boykins, a senior from Jamesville-DeWitt who loves the hands-on learning under culinary instructor Robert Canorro at the Thompson Road Campus.

"Jaleel comes to class every day willing and ready to learn," Canorro said. "His work ethic, personality and dedication are and will be his greatest asset."

Last year, Jaleel had a positive experience working in his home school cafeteria. The manager there described Jaleel "as one of the nicest, hard-working students she has ever had," Canorro said.

For Jaleel, the chance to practice culinary skills in high school — now for two years in a row — means he should be motivated and well-prepared when he applies to college next year to pursue a career in the field, Canorro said.

Today and throughout his life, Jaleel views the food service industry as a perfect way to blend the necessity of making money with a labor he certainly loves. His favorite task at the moment: baking.

"The hands-on learning really suits me," Jaleel said. "I enjoy it."

Did You Know?

Jamesville-DeWitt continues its commitment to offering students high-quality science learning opportunities through their engagement and support of the transition to the new Smithsonian Science in the Classroom elementary curriculum program. Additionally, a team of Jamesville-DeWitt middle school teachers presented a live research lesson at the November 2017 "It's Go Time" Science Conference, helping teachers and administrators from across the state understand the New York State Science Learning Standards.
