

Haun Welding Supply Job Opening 11/30/18

We are in the process of looking for someone who has training after high school with **2 years of piping, mechanical systems and or HVAC experience to work in our Cryogenics department.** They install liquid storage bulk tanks and lay pipes at customer sites. It is a full time position, with benefits. I have attached the job ad as a word document. We are having some difficulty finding someone right now and we thought it would be a good idea to reach out to some of the trade schools like Boces and see if there is someone who has recently graduated who might fit these credentials and would be looking to start a career. Please let me know .if you have any questions and feel free to call me as well.

Thank You,
Zakkary Kimball
