The Responsive

Classroom®

2010 Spring Institute

Creating Academically Challenging and Caring Classrooms K-6

Responsive Classroom I:

Introductory Week

The *Responsive Classroom* is an approach to teaching that helps build a strong social curriculum and an appropriate academic content. *Responsive Classroom* strategies weave through the fabric of daily school life creating a learning community that is both academically challenging and socially responsible. Implemented in thousands of classrooms over the last twenty years, these methods enhance academic performance, increase social skills and reduce problem behavior.

This week-long institute focuses on helping elementary educators learn how to use the classroom practices at the heart of the *Responsive Classroom* approach. The courses build on each other, so K-6 Educators who are new to the *Responsive Classroom* approach, or who are using some of the practices but have not taken RCI yet, should begin with *Responsive Classroom I*.

As a result of this professional development, participants will learn about five of the fundamental practices of the *Responsive Classroom* approach:

- ***Morning Meeting***
- ***Rules Creation***
- ***Logical Consequences***
- ***Interactive Modeling***
- ***Positive Teacher Language***

OCM BOCES is a public entity duly licensed by Northeast Foundation for Children, Inc., to conduct The Responsive Classroom® courses.
