Career & Technical Education

New York State's approval process for Career and Technical Education (CTE) programs has raised the quality and rigor of courses that prepare students for employment and postsecondary study. Approved programs lead to an industry-recognized credential or certificate at the postsecondary level, or an associate or baccalaureate degree. CTE courses offer students the opportunity to apply academic concepts to real-world situations and prepare them for industry-based assessments or certifications. They have the opportunity to earn college credit or advanced standing while still in high school and take part in work-based learning opportunities where they demonstrate mastery of skills essential in the workplace. In addition, our Technically Endorsed programs, embedded in area businesses, have been recognized by *District Administration* magazine as one of more than 30 national innovative programs.

In 2020, 441 seniors from OCM BOCES' component districts were eligible to earn CTE endorsements on their high school diplomas, including Marcellus students Noah Bealer, Evan Cormack, Justin Crysler, Tyler Daeffler, Griffen David, Alexander Elderbroom, Ian Emmons, Logan Gallogly, Andrew Grashof, Dakota Higgins, Sarah Jeske, Jordan Kelly, Anthony Kelly, Benjamin Lanning, Margaret Maclachlan, Thomas Mills, and Joshua Wilkinson.

OCM BOCES & Marcellus = Student Success

The opportunity to work and study at WCNY in the Media Marketing Communications Program has proven to be an exciting, one-of-a-kind experience for Marcellus senior Lyle Freeman, whose exuberance about the OCM BOCES business-embedded program is apparent. Simply put, he loves it.

"The possibilities are endless! You can do anything!" he said, referring to his favorite aspects of the program. "I like hands-on learning, and I get it here at OCM BOCES, whether it's video, photography, graphic design, radio production or communication. This is my field of study — I am passionate about it — and I get to do it every day."

His teacher, Marybeth Longo, says Lyle is an exceptional young man who fully embraces the real-world opportunities at WCNY and enjoys the new and lasting friendships he has formed with his classmates. The program, she said, has also opened his eyes to several new career possibilities. When he first signed up for the program as a junior, Lyle's passion was for radio. Today, after diving into digital media (graphic design, video production, and editing), his interests are turning to television or videography.

"So many doors and interests are opening up for me in this program, so who knows?" Lyle said.

He is sure of one thing. The confidence he has gained at WCNY has made him feel well-prepared and "ahead of the game" for college.

"This never would have happened if I didn't take the chance and come to this program," he said.

Did You Know?

OCM BOCES Instructional Support Services invited leaders from multiple districts to be a part of the STEM Advisory Panel during the 2019-2020 school year. STEAM and Innovation Coordinators Eric Hubbard and Karen Quill have represented Marcellus on this panel and have helped guide regional leadership networks in math, science, and computer science. Throughout the closure in the spring of 2020, Eric Hubbard helped organize and facilitate resource-sharing sessions for engineering and technology teachers from around the region. The guidance of the Marcellus team has been invaluable in meeting the needs of local teachers through leadership networks and other opportunities.
