You, Me and the Wii:
Nintendo Wii's in School Libraries

Why Gaming in the School Library?

- Digital Game Based Learning meets the needs and learning styles of today's and the future's generation of learners.
- Digital Game Based Learning is motivating because it is fun.
- Digital Game Based Learning is enormously versatile, adaptable to almost any subject, information, or skill to be learned, and when used correctly, is extremely effective.

                                        -Marc Prensky, Digital Game Based Learning, ©2001

Nintendo Wii in School Libraries:
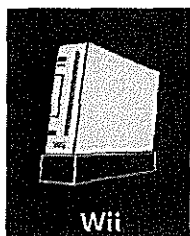

The Nintendo Wii strategically placed in a school library setting has the unique ability to promote collaborative units of study with teachers in multiple content areas. This investment creates the architecture for digital game based learning that can (1) connect to classroom instruction and New York State standards and benchmarks for learning, (2) motivate students to learn content, (3) provide opportunities to learn and practice critical 21st century information literacy skills, and (4) allow for aesthetic growth and provide a fun and effective way for students to learn.

In Connection with the American Association of School Libraries Standards for the 21st Century Learner:

- Students *actively participate in the gaming experience* and work with information *to make inferences and create meaning.*
- Games are *engaging* and often have *a learning curve that builds toward proficiency.* Students have the potential to excel within a game by *self-monitoring how they utilize information* during play *to determine its usefulness and effectiveness.*
- Games are *participatory* and encourage *learning communities* through *sharing of concepts and strategies, collaboration amongst players and reflection on personal performance.*
- Through the use of well developed themes games can *connect ideas to the interests of students and build upon their previous knowledge and experiences.*

Expanded Interlibrary Loan Service   CoSer # 572.220

The expanded interlibrary loan component includes verification and solicitation of books, periodicals and audio-visual resources from sites outside the jurisdiction of Onondaga-Cortland-Madison County component school districts. These sites include:

> New York State Library,
> > Onondaga Public Library,
> > > Academic, Public or Special libraries

within the United States. The SLS will provide resources from international locations when appropriate. If you use the Expanded Interlibrary Loan services from the SLS office, this service is available.

Customized research, including scientifically-based research, is conducted on any topic to meet the educational and information needs of staff and students. Searches result in a bibliography of relevant documents meeting the specific criteria of the requestor. In addition, access to the cited document(s) is available through the interlibrary loan services of the OCM BOCES School Library System. Requests may be specifically directed to a particular database or may be performed as the results of a reference question. Recent research questions include: push in model for reading teachers, recommended reading lists for early literacy, half day vs. full day kindergarten, and school climate, trust and student achievement relationship.
