

Technology Vision Statement

The vision of Onondaga-Cortland-Madison BOCES is to provide all students with access to technology in order to enhance their learning and be prepared for their future. We envision the seamless use of technology in our programs for students and staff in order to ensure that:

- Students are prepared to be global citizens.
- Students are consistently engaged in real world, relevant learning.
- Students can effectively access the information they need.
- Students think critically about the information retrieved and produced via technology.
- Students use technology responsibly.
- Students with special needs use innovative technology to enhance their communication and learning.
- Students are competitive in their chosen career field with access to the most up-to-date technology in their Career & Technical Education program and are prepared for post-secondary education.
- Students are able to employ technology to creatively solve problems.
- Students are able to use technology in all classes, throughout their programs, whenever it will enrich their learning experience.

In order to achieve this vision, it is critical that:

- Teachers participate in on-going professional development.
- Teachers design instruction that consistently incorporates the use of technology to enhance and assess learning.
- Classrooms and programs are equipped with the necessary technology to ensure all students have equal access to technology.
- The infrastructure is present to support the vision.
- OCM BOCES' leadership team provides the resources to implement the vision.
