Career & Technical Education

New York State's approval process for Career and Technical Education (CTE) programs has raised the quality and rigor of courses that prepare students for employment and postsecondary study. Approved programs lead to an industry-recognized credential or certificate at the postsecondary level, or an associate or baccalaureate degree. CTE courses offer students the opportunity to apply academic concepts to real-world situations and prepare them for industry-based assessments or certifications. They have the opportunity to earn college credit or advanced standing while still in high school and take part in work-based learning opportunities where they demonstrate mastery of skills essential in the workplace. In addition, our Technically Endorsed programs, embedded in area businesses, have been recognized by *District Administration* magazine as one of more than 30 national innovative programs.

In 2019, nearly 440 seniors from OCM BOCES’ component districts were eligible to earn CTE endorsements on their high school diplomas, including Cincinnatus students Timothy Aitchison, Klayton Brown, Jacob Burlingame, Ethan Falciola, Jeremy Rice, Jeffrey Rice, Makenzie Rice, Chelsea Smith, William VanWagenen, and Logan Warner.

OCM BOCES & Cincinnatus = Student Success

Cincinnatus senior Leann Rutan has been fascinated with the clinical observations she gets to experience through the OCM BOCES Physical Therapy Program in Cortland. The two-year program, embedded at Fadden & Associates Physical Therapy, has given her an in-person look at careers in occupational therapy, physical therapy, radiology, sonography and more.

Just as important, it has given her practical experience with a long list of “soft skills” that will help her succeed in college and the workplace, said her instructor, Dr. Christine Bosco. These skills include organization, time management, self-motivation, communication, and professionalism. Bosco said the Physical Therapy program is especially conducive to these achievements because students have to juggle the demands of the OCM BOCES coursework with clinical rotations and college-level curricula offered through Tompkins Cortland Community College.

Leann has managed to meet that challenge, Bosco said.

“Leann is self-motivated about all her coursework,” Bosco said. “She is also organized and passionate about what she does. She dives into projects showing initiative and creativity.”

Leann’s future came into focus after she and her classmates observed the radiology department at Guthrie Cortland Medical Center. Next year, she plans to attend SUNY Broome Community College to earn a degree as a radiology technician. Studying at OCM BOCES, she said, prepared her well for this field, especially the program’s Anatomy & Physiology course.

“In physical therapy, we have to learn all the parts of the human body system, including all 206 bones — and the organs — and how they function and move,” Leann said. “This applies to radiology because, as a radiologist, you have to know the human body inside out to know what you are looking at in an X-ray.”

Did You Know?

Cincinnatus is undergoing the rigorous process of Strategic Planning to ensure continuous improvement across the organization. Stakeholders — faculty and staff members, parents, students, community members and business leaders — are taking part in personal interviews and a digital survey to share their ideas, suggestions and concerns. They will also have opportunities to participate as members of the core planning committee or action teams developed around specific goals. This work will be facilitated by the OCM BOCES Assistant Superintendent for Instructional Support Services and the Director of Educational Programs, each of whom are nationally certified by the American Management Association.
