## Career & Technical Education

New York State’s approval process for Career and Technical Education (CTE) programs has raised the quality and rigor of courses that prepare students for employment and postsecondary study. Approved programs lead to an industry-recognized credential or certificate at the postsecondary level, or an associate or baccalaureate degree. CTE courses offer students the opportunity to apply academic concepts to real-world situations and prepare them for industry-based assessments or certifications. They have the opportunity to earn college credit or advanced standing while still in high school and take part in work-based learning opportunities where they demonstrate mastery of skills essential in the workplace. In addition, our Technically Endorsed programs, embedded in area businesses, have been recognized by *District Administration* magazine as one of more than 30 national innovative programs.

In 2022, 294 seniors from OCM BOCES’ component districts were eligible to earn CTE endorsements on their high school diplomas, including East Syracuse Minoa students Dakota Allen, Joseph DeMore, Amina Korman, Michael MacCombie, and Davis Nielsen.

## OCM BOCES & East Syracuse Minoa = Student Success

Bryce Jones has a strong work ethic and a loving, caring nature — the kind of temperament “that will make her an incredible nurse someday,” said Tracy Finke, BSN, RN, her teacher in the two-year Health Occupations program at the OCM BOCES Thompson Road Campus.

Last year, as a sophomore, Bryce told her school counselor she wanted to work in pediatrics. At BOCES, she has gotten a theoretical and practical look at the nursing profession and an overview of the education and training she will need to become a pediatric nurse. Still satisfied and excited about her career choice, Bryce is setting her sights on getting into Texas University because the school has a reputable nursing program.

At BOCES, Bryce stands out as an excellent student. She participates in class, works hard on all of her assignments, shows professionalism in everything she does, and enjoys collaborating with her peers.

“Bryce is very easygoing, and she is always willing to work with anyone in the class to help them,” said Tammy Carter, BS, RN, a clinical instructor.

Bryce loves working with students from other districts and has made “friendships for life.” She enjoys working in the hands-on laboratory and is looking forward to her clinical experience, which involves working with patients one-on-one in a long-term care setting.

Bryce and her classmates also have the opportunity to earn a New York State license as a Certified Nursing Assistant and get additional certifications in CPR and First Aid. They can also take advantage of business-based internships and earn a Career & Technical Endorsement on their high school diploma by successfully passing an industry-standard assessment.

Finke is confident her student will succeed in the class, in her clinical experience, and in her career.

“Bryce is an extremely caring individual who works hard to accomplish her goals,” Finke said. “I am sure she will excel.”

## Did You Know?

Over the summer, Instructional Technology Integration Specialist Tim Patterson held 12 professional development sessions for teachers focusing on technology integration. This year, in addition to providing daily classroom support, he has also been collaborating with ESM STEM and Science Instructional Specialist Pam Herrington to introduce the New York State Computer Science and Digital Fluency Learning Standards to ESM teachers. Going forward, Pam and Tim will support curriculum development to fully implement these standards. Their work has also focused on supporting a new 6th-grade computer science course.
