

Water Cycle Wheel

Name- _____

Cut out the large circle and the water drop "spinner". Attach the spinner to the circle using a fastener.
Move the water drop through the water cycle stopping to write the related word (see list) in the right places.

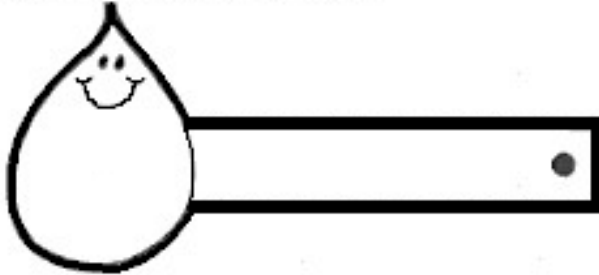

- | |
|---------------|
| evaporation |
| condensation |
| precipitation |

MY Water Cycle Wheel

Name- _____

Draw the water cycle in the circle. Do this so that you can attach the water drop (with a fastener) and move the water drop through the water cycle. Add the water cycle words (see list) to your drawing in the correct places.

- | |
|---------------|
| evaporation |
| condensation |
| precipitation |
