This course will provide educators new strategies to reach the 21st Century learners. Participants will learn cutting edge instructional strategies to increase student achievement and engagement. Every participant will create curriculum projects and a comprehensive plan to bring these Web 2.0 strategies to students.

This is a practical course designed for the specific needs of educators as they work with the 21st Century learners. New skills are needed to plan and present lessons that engage students of all abilities. This course is focused on redesigning curriculum and integrating the rich resources in various software packages and in online communities. Teachers will create various multimedia projects that they can use with their students.

Further, participants will learn how to organize digital resources to share with colleagues. Other areas explored through course include assessment, differentiating curriculum, meeting the needs of students of all abilities, and engaging students to increase student achievement. This is a practical class tailored to the specific instructional needs of each participant.

Some topics include:

Laptops in the classroom
Explore and Develop WebQuests
Search AND Find: Advanced Searching on the Internet
Information Literacy
Digital Images Across the Curriculum
Creating a Personal Digital Filing Cabinet
Creating Electronic Portfolios
Publishing Globally
Internet Resources for your Digital Filing Cabinet
Adapting Curriculum for Special Education Students
Classroom Management and Technology
GPS and GIS in the Classroom
Curriculum Mapping
2.0 and Classroom Instruction

Equipment needed:

Each participant will need their own computer and ear buds or headphones.
