LOOKING OUT FOR YOU

Through a few policies and programs, like Prior Authorization and Step Therapy, we work alongside your doctor to make sure you're getting the most appropriate and cost-effective care for you.

Prior Authorization: Certain medications require prior authorization from our team of clinical pharmacists and physicians before it will be covered. We serve as a second set of eyes to help ensure that a prescribed drug or dose is safe and appropriate for your specific medical condition based on FDA and manufacturer guidelines, medical literature, safety, appropriate use, and benefit design.

Step Therapy: Some conditions can be treated by multiple medications with varying costs. To help save you money, this program requires that you try a certain drug, usually a lower-cost generic, as a first "step." If the first step drug does not work for you then you move to the next "step," which is usually a brand-name drug with a higher copayment.

4 WAYS YOU CAN STAY ON TOP OF RISING PRESCRIPTION COSTS

Worried about high prescription drug costs? We're here to help. Check out the tips below to score some unexpected savings.

ASK ABOUT GENERICS

Ask your doctor if there are low-cost alternatives to expensive name-brand drugs. Many generics offer the same ingredients for significant savings. Some plans don't charge for Tier 1 generics.

CONSIDER HOME DELIVERY

Ordering a 90-day supply of your prescriptions through our mail order pharmacy partners can deliver savings up to 33%. This is ideal (and required for some plans) if you take a prescription medication on a continuing basis.

START SMALL

When starting a new prescription, ask for samples or a short supply to start. That way, if you experience any side effects, or the medication doesn't work as expected, you won't be stuck with more than you need.

LOOK INTO DRUG DISCOUNTS

It's right there in the name. If you qualify for drug discounts, you can get help paying for your medications with copay discount cards, manufacturer coupons, and other options.
