

Say Hello to Target Optical and Pearle Vision!

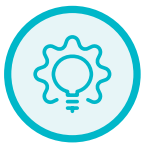

Throughout 2024, our client's members across the country will be able to use their in-network benefits at even more locations.

We are dedicated to providing a breadth of choices through our industry-leading networks. As such, we are pleased to announce that we have expanded the Davis Vision network to now include **Target Optical** and **Pearle Vision** retail locations!

Altogether, our network enables members to see optometrists (OD) and ophthalmologists (MD) from over **150,000** in-network points of eye care access.¹

Our commitment to provider choice and access continues to be one of our key initiatives. This enhancement will provide high interest providers as in-network options for your members.

These additions are reflected in our network directory at davisvision.com/locator. *Not all locations are available immediately – locations will be added throughout 2024.*
