TST BOCES

## Solution Tree Presenter

**Dr. Dennis King**

Dr. Dennis King earned his doctorate from St. Louis University, and has devoted 18 of his 24-year career to administrative positions, including assistant principal, principal, and executive director of school improvement. He has worked with teachers and administrators throughout the country to implement PLC concepts.

As a leader in the Department of School Improvement, Dr. King played a major role in developing this district-wide initiative. In turn, educators at the school level responded by aligning their foundation of principles, creating collaborative teams, and developing school-based interventions that focus on results.

Dr. King connects with educators as a fellow practitioner, inviting them to explore PLC strategies and develop a plan that meets their unique needs. Based on personal experience, his sought-after presentations reveal the power of PLCs and assessment FOR learning.

Summer learning for  
leaders

Excellent regional  
networking opportunity
